

Information Security Exercise

Hans Georg Schaathun
Høgskolen i Ålesund

Week 4 Autumn 2011

Task Consider a case study of a dentists' surgery and determine how they can comply with the data protection act (personopplysningsloven) and if possible, also *Helseopplysningsloven*.

Objective Your goal is to become familiar with relevant data protection and privacy legislation, and be able to design compliant security policies.

Submission

1. The submission should be in the form of a single PDF document.
2. Name and email address must display clearly on the first page.
3. *Deadline* Monday 19 September 2011 by 6am in Fronter.

Contents A typical report should contain

Introduction (very brief)

Background answering

1. What is the purpose of data protection legislation?
2. How is personal information defined?
3. How is sensitive information defined?
4. What are the most important requirements in the law?
5. If possible, discuss *Helseopplysningsloven* in a similar way.

Assets and requirements Discuss the information assets which are held by the surgery and which may be covered by the relevant legislation.

Measures Building on the two preceding sections, discuss what measures are required by the legislation.

Good luck
