Information Security Exercise

Hans Georg Schaathun Høgskolen i Ålesund

Week 7 Autumn 2011

- **Task** Review *at least* one Risk Management Framework (standard/methodology) in addition to FAIR, and compare them to eachother. You can use ISO 27000, NIST 800-XX or any other framework you can find. Which do you find most useful for what purposes?
- **Objective** Your goal is to strengthen your understanding of risk management and different approaches thereto.
- Submission
- 1. The submission should be in the form of a single PDF document.
 - 2. Name and email address must display clearly on the first page.
 - 3. Deadline Monday 10 October 2011 by 6am in Fronter.

The report should include an introduction with an overview of the report, brief synopses of each of the frameworks, a discussion of key differences, and a conclusion giving the author's opinion of where and when each framework is appropriate. It should consider the key differences in relation to relevant use cases, as a basis for the conclusion. This may be a separate section or part of one of those listed.

Good luck
